

PRECAUTIONARY BOIL WATER NOTICE

ST. JOHNSBURY WATER SYSTEM

(St. Mary Street Only)

Due to low water pressure encountered during emergency repairs on **St. Mary Street** there is a possibility that your drinking water may have become contaminated. The St. Johnsbury Water System is issuing a **PRECAUTIONARY** Boil Water Notice for **St. Mary Street** effective immediately and until further notice.

(This boil order is for St. Mary Street only and does not affect the rest of the water system)

What should I do?

- **DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST.** Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation **until further notice**. Boiling kills bacteria and other organisms in the water.
- Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other; potentially-harmful, bacteria may be present. When a water system is experiencing fluctuations in water pressure the possibility exists for bacteria and other harmful organisms to enter the water distribution system and contaminate your drinking water supply.
- People with severely compromised immune systems, infants, and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1 (800) 426-4791.

What happened? What is being done?

This Boil Water Notice will remain in effect until the water system has recovered and the system is able to demonstrate that the quality and quantity of the drinking water meets State and Federal drinking water standards.

We will inform you when the recovery has been completed and tests show no bacteria present in the drinking water supply.

For more information, please contact Dan Gray at 802-748-9408. General guidelines on ways to lessen the risk of infection by microbes are available from the Water Supply Division at (800) 823-6500.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This information is being sent to you by St. Johnsbury Water System.
